

# Guns & Accessories

## for two-hose CAB blasters

### Choose the most suitable gun for your specific application!

All CRYONOMIC® guns have their specific applications. They can all be used with every type of CRYONOMIC® two-hose dry ice blasters.

#### The most powerful and versatile: G5000 series ①

The G5000 two hose gun is the standard and most powerful gun. The gun is available with different options: remote control, air volume control or both.

#### Poor accessibility? ②

The MG1002 is our single hose gun that can work on the two-hose and one-hose blaster.

#### Compromise? ③

The MG2000 is a small but powerful two-hose gun, suitable for heavy duty cleaning applications with space constraints.

#### Robot application? ④

Select the RG2000. This effective two-hose gun is designed for automated dry ice blasting.

#### Live (low- to mid-voltage) equipment? ⑤

The MG1003 is the full plastic version of the MG1002 for applications where non-conductive tooling is a safety requirement.

#### Poor visibility? ⑥

The adjustable CRYONOMIC® gun light provides a clear white spot on the object to clean, focused at the ideal working distance.
